

# BlueBox 450RO / 200DS

MUCH  
MORE  
WATER

- **New innovative mobile solution for both fresh and saline water cleaning**
- **Can produce clean drinking water from both fresh water and saline water**
- **The two technologies allow for optimal mobility and be deployed anywhere in the world**
- **Always safe and clean drinking water whatever the source**
- **Man portable small and compact water purification**

**The BlueBox 450RO / 200DS provides drinking water quality anywhere in the world from any water source**

**Fresh water unit**

**Sea Water unit**

The bespoke design can deliver 450 litres/hour of clean drinking water from a fresh water source and 200 litres/hour from a saline water source.

The two units are logistical optimised with a modular design with each module weighing max. 50 kg.

The rugged boxes are designed for Military operation and Emergency deployment.

The BlueBox 450RO / 200DS solution is ideal Emergency Agencies, NGO, and Military in remote areas near coastline.

The combination of the Fresh water and Sea water purification system offers maximum flexibility with its high mobility and can deliver clean drinking water from any water source.
