THE UNFOLDING TV

N1

N1 137"

Redefining Luxury Living Spaces

Discover the seamless fusion of the highest technology and exclusive design. Our TV collection, elegantly transforming into a sideboard, sets new standards in every environment. In the historic ambiance of a palace, the model in black piano lacquer accentuates the room's elegance with its flawless surface. In a New York City apartment, the silver metallic variant reflects the dynamic atmosphere of the city, perfectly adapting to the modern living style. In a Florentine living space, the model made of noble wood expresses the warmth and rich tradition of Italian craftsmanship. Each model in our collection is characterized by unique elegance, created not only to function in a variety of environments but to enrich them.

Open Elegance: Beyond Wall-Focused Living

Flexible positioning

Place your TV in front of a glass window or a wall, there is no limit. Its easy-to-install and practical design adapts to your needs in any environment, making your cinematic sideboard an aesthetic addition in any form.

And as if that wasn't enough, this extraordinary screen can rotate up to 180 degrees, adjusting effortlessly to your preferred viewing angle. When the show is over, it elegantly folds back onto its base, waiting discreetly for the next time it can enchant you.

The petite model

N1 - 110"

The N1 TV, with its 4K MicroLED technology and HDR10+ support, brings to life the deepest blacks and most vibrant colors thanks to its special screen coating that virtually eliminates glare. C SEED's unique Adaptive Gap Calibration ensures that the borders between the panels vanish, giving you a perfect, uninterrupted visual experience.

The 110" model is the smallest version in the series, making it even more suitable for seamless integration into the seating arrangement.

The big one

N1 - 165"

Imagine a TV that gracefully rises to a majestic height of three meters and five MicroLED panels unfold like the petals of a blooming flower, forming a stunning 165" display in only 45 seconds.

These panels come together flawlessly, creating a seamless screen that springs to life with the brilliance of 64 billion colors, offering an ultra-high resolution that transforms any room into a cinematic paradise, regardless of the lighting.

The 165" model is the biggest version in the series, letting you immerse yourself in a multi-sensory experience like no other.

Single View Elegance: „A Curated Showcase of Classic & Bespoke“

With its unique design language that combines curves with straight lines and functionality, the N1 is perfectly suited for a wide range of design directions, including contemporary Art Deco, Organic Modern, and Industrial. “Bespoke” customizations enable the inclusion of bold artworks and the selection of exceptional material combinations, resulting in an unparalleled identity for each space.

Color and Technology

Colorscheme:

Classic

Beyond the carefully curated and presented color combinations, we offer the opportunity for even more customization options. Our nine „Classic“ colors and materials, along with the choice of finish from high gloss, semi-gloss, to matte and metallic allow for even finer nuances - especially when you take control of the seven customizable parts to further refine the device to suit your interior.

Wood finish

The C SEED N1 Wood Finish options add natural elegance through premium materials like walnut or oak. These handcrafted surfaces bring warmth and texture to the TV's sculptural design. Each wood finish is carefully selected to blend seamlessly with luxurious interior environments.

Statement

Choose from 16 refined Statement Colors, each designed to elevate the N1 into a true sculptural centerpiece. These premium finishes let the TV harmonize with a wide range of interior styles. Every color is meticulously crafted to emphasize the N1's architectural form and luxurious presence.

Bespoke

Within the scope of our „Bespoke“ program, we open an exclusive realm of tailored elegance and personal design visions. This offering is aimed at those who seek not just to inhabit spaces but to curate them, in close collaboration with interior architects, designers, and artists. Understood as a dialogue between your visionary ideas and our team, „Bespoke“ allows for the definition of spaces through differentiated colors and materials.

Classic Colors

Alpine White (C1) Silver Lining (C2) Sandstone Glory (C3) Desert Pearl (C4) Earth Harmony (C5) Velvet Sand (C6) Vienna Grey (C7) Urban Strength (C8) Night Ash (C9)

Statement Colors

Golden Joy (S1) Radiant Flame (S2) Nightfire (S3) Wine Red (S4) Sky (S5) Forest (S6) Emerald (S7) Ice (S8) Royal Blue (S9)

Cobalt (S10) Ocean (S11) Twilight Taupe (S12) Soft Grey (S13) Cherry Pink (S14) Dark Cherry (S15) Caramel Drift (S16)

Center Sliding

With the new Center Slider option, the TV can now glide smoothly into the exact center of the base plate, creating a perfectly balanced and visually harmonious installation. This added mobility offers greater freedom in room design, ensuring

the screen aligns precisely with your seating position or architectural layout. Whether you're aiming for a symmetrical focal point, need greater flexibility in positioning, or simply prefer a cleaner, more centered aesthetic,

the Center Slider provides a refined and effortless solution. The movement is engineered to be silent, stable, and precise - fully in line with C SEED's commitment to premium mechanical performance and elegant design.

C SEED Media Controller — One Box. Unlimited Possibilities.

The C SEED Media Controller unifies audio-video processing, programmable logic control, video input selection, and system control PC functionality into a single, beautifully engineered unit that discreetly sits beside your N1 TV. Installation becomes true plug-and-play, eliminating the need to run specialized cabling through multiple rooms - no dedicated rack or control room is required.

Faster installation: N1 TV and controller can be positioned in one room—one box, one power line, and short, local cable runs.

Cleaner design: The need for an AV rack and a separate tech room becomes obsolete, enabling pure, seamless, and purposefully clean aesthetics.

Greater reliability: Fully integrated, single-source hardware reduces interfaces compared to third-party equipment and simplifies servicing.

Unified control: Manage the entire transformation from sculpture to TV, select the desired input, adjust brightness, and control volume - all with one device.

Easier integration: Setting up the N1 TV as a single video and 2.1 audio source is as straightforward as integrating it into your home cinema.

Clean interior. Seamless control. Ready for performance.

4K MicroLED technology - the huge leap ahead

Conventional LED

C SEED MicroLED Technology

Total TV Experience

Futuristic design meets futuristic TV engineering:

- C SEED MicroLED outpaces conventional TV displays.
Micrometer-sized LED lights create stunning, lifelike colors and brightness on a self-illuminating 4K/8 million pixel display that accurately delivers the color gamut of high-end DSLR cameras. Not only today and tomorrow - forever:
MicroLEDs are made of long-lasting materials, giving the C SEED screen a potential lifespan of up to 100,000 hours.
- DEEP BLACK
Black is the all-important touchstone of display technology. Total Black employs a special surface treatment to achieve stunning contrast and perfect detail, while preventing glare.
- PURE COLOR
True colors are the life of a display, and the C SEED MicroLED brings colors to life like never before with approximately twice the color purity of conventional LEDs.

C SEED uses cutting-edge MicroLED technology to achieve superior contrast, brightness and an unparalleled color spectrum. C SEED video processing creates true-life images with a color processing depth of 16-bit per color and advanced HDR and HDR10+ processing for a superior viewing experience. MicroLED technology is a revolutionary leap ahead, providing twice the color purity and a far wider color gamut than conventional LED screens, creating fully natural colors, optimum peak brightness and most accurate grayscale images. For a TV experience like never before.

MicroLED

Totally seamless: AGC patented Adaptive Gap Calibration

Folding screen pioneer C SEED leads the way with the patented game-changing Adaptive Gap Calibration: AGC is an automatic distance measuring and calibration system that creates totally seamless foldable TV surfaces, free from any visible gaps.

High-resolution sensors detect potential offsets between the folding TV wings, measuring fractions of millimeters and autonomously calibrating the corresponding LEDs' specific brightness to render gaps invisible. C SEED's patented AGC technology guarantees the perfectly seamless indoor TV experience.

Total quality sound

Every C SEED N1 comes with onboard 2.1 high-end audio for total quality sound to match the screen's unparalleled visual quality, with the soundbar organically integrated into the frame design. The necessary interfaces for latest external audio up to 9.2 are on board as well.
